TECHNICAL SKILLS

Frontend

- React.js, JavaScript
- HTML5, CSS3, Tailwind CSS
- Vite

Backend

- Node.js, Express.js
- REST APIs
- JWT Authentication, bcrypt

Database

- MongoDB, MongoDB Atlas
- Mongoose

Tools & Deployment

- Git, GitHub, Postman
- VS Code, Vercel, Axios

Additional Knowledge

- Python, SQL, C++, C#
- React Native (Mobile)
- Networking & Cyber Security Fundamentals

EDUCATION

BS Computer Science

Muhammad Ali Jinnah University (MAJU)
[ADD EXPECTED / ACTUAL GRADUATION YEAR]

CERTIFICATIONS

Introduction to Data Science

MAJU — 2026

Mobile Application Development

MAJU — 2026

Cyber Security Fundamentals

MAJU — 2026

Frontend & Backend Web Development

PROFESSIONAL SUMMARY

Computer Science graduate and Full Stack MERN Developer with hands-on experience building responsive, database-driven web applications using React.js, Node.js, Express.js and MongoDB. Skilled in REST API design, JWT authentication and frontend-backend integration, with practical experience deploying full-stack applications through Git/GitHub and Vercel. Brings this alongside three years of hands-on IT support experience in a fast-paced technical environment.

PROJECTS

UmairStore — Full Stack MERN E-Commerce Application

Technologies: React.js, Node.js, Express.js, MongoDB Atlas, Mongoose, Tailwind CSS, Vite | [Live Demo](#) | [GitHub](#)

- Built and deployed a full-stack e-commerce web application using React.js, Node.js, Express.js, MongoDB Atlas, Mongoose, Tailwind CSS and Vite.
- Implemented JWT-based authentication with bcrypt password hashing, including a forgot/reset password flow.
- Developed product browsing, category filtering, search, shopping cart, checkout and order management.
- Built a user dashboard with wishlist, saved addresses, notifications and demo wallet functionality.
- Developed admin-side functionality for managing store operations.
- Designed REST APIs and integrated frontend/backend using Axios; deployed on Vercel with MongoDB Atlas as the cloud database.
- Applied responsive design principles and maintained version control through Git/GitHub.

CarAya — Smart Ride-Hailing Mobile Application (Final Year Project)

Technologies: React Native, JavaScript, REST APIs, Zustand, MMKV, Socket.io, Mapbox

- Developed the frontend of a cross-platform ride-hailing mobile application using React Native and React Navigation.
- Implemented state management with Zustand for authentication, ride management and driver workflows.
- Built authentication screens with OTP verification and secure session persistence using MMKV.
- Integrated REST APIs for authentication, ride requests and user management.
- Implemented real-time ride tracking and status updates using Socket.io and Mapbox integration.
- Collaborated in an Agile team environment to deliver the university Final Year Project.

PROFESSIONAL EXPERIENCE

IT Support Technician | Hadeed Bone And Joint Hospital

- Provided IT support and maintenance for hospital computer systems, printers and network devices.
- Installed and managed CCTV surveillance systems, including monitoring through DMSS/DMS software.
- Performed Windows OS installation, troubleshooting, system optimization and routine maintenance to minimize downtime.
- Supported staff with hardware, software and connectivity issues while maintaining IT asset records and technical documentation.

Motivated to apply strong analytical and development skills to deliver real-world, scalable solutions.
